Abstract
In responds to the growing need to address the housing problems of an ageing population, the HDB has introduced the Studio Apartment for the Elderly in the later part of 1997. This paper then embark on the task of investigating the scheme in various aspects to find the merits as well as the potential problems it might create. At the same time look into alternative, improvements or refinements of the scheme.

The research will be based on three major aspects of the scheme, Financial, Social/Community, Design/Physical Environment. The study into the proposed scheme in all the above mentioned aspect, would be done through statistical findings, press releases, and interviews.
